Portfolio: <https://www.ha-zeek.xyz>

A recent technology graduate with project management experience, I bring a multifaceted background from the pharmaceutical industry to the tech field. My technical skill is further sharpened by a Software Engineering bootcamp at General Assembly. I am passionate about harnessing technology to solve complex problems and am eager to bring my project management prowess and technical expertise to a dynamic and innovative team. My strong communication skills and ability to manage multiple projects simultaneously have been enhanced through a hands-on web development internship, where I contributed to the design, development, and maintenance of a community-driven event management platform. This experience allowed me to apply modern web frameworks like Laravel and collaborate effectively with cross-functional teams, demonstrating my capacity to add value to any forward-thinking organization.

PROFESSIONAL EXPERIENCE

Xentral Methods Sdn. Bhd. – Cyberjaya, Selangor

Full Stack Developer

2023

Intern

- Assisted in the design, development, and maintenance of web applications leveraging the TALL stack (Tailwind, Alpine JS, Livewire, Laravel) within a team of experienced developers, contributing to complex projects.
- Engaged in collaborative efforts with cross-functional teams to develop optimal solutions, ensuring timely project delivery and enhanced application performance.
- Played a key role in database management by learning, designing, and executing basic MySQL queries under supervision, improving database efficiency and reliability.
- Acquired hands-on experience in deploying, monitoring, and maintaining web applications on cloud platforms such as AWS and Digital Ocean, emphasizing scalability and security.
- Aided in the integration of various APIs and third-party services, enriching application features and user experience.
- Addressed and resolved technical issues efficiently by troubleshooting and debugging, maintaining adherence to industry best practices for code quality and security.
- Contributed to the development of clean, maintainable code while being actively involved in code reviews to ensure adherence to best programming practices.
- Demonstrated a commitment to professional growth by continuously learning and adapting to new technologies and industry trends, staying abreast of modern development practices.

Novugen Pharma Sdn. Bhd. – Shah Alam, Selangor

Associate Executive, Project Management

2021 – 2022

Full Time

- Oversee and manage 7 R&D projects/products and 10 manufacturing plant projects, ensuring all projects are on track and meeting project deadlines set by Management.
- Conduct weekly Plant meetings to track, update and ensure Plant projects are meeting timelines.
- Conduct monthly meeting to provide updates to CEO, SVPs, and other leadership on the progress of projects.
- Establish project objectives, determining project priorities, identifying risk, managing progress, gaining cooperation of other CFTs, and assisting in solving potential conflicts.

- Executed specific tasks within project, including drafting communication, negotiating with internal and external teams in order to meet timelines, creating project evaluation, micro-timelines & macro-timelines.
- Track deliverables/materials, schedules and metrics for project providing clear tasks and accountability for project stakeholders and team members to ensure project are on time and adhere product specification.

EDUCATION

Taylor's University – Subang Jaya, Selangor
Bachelor of Biotechnology (Hons.)

2017 – 2020

General Assembly– Petaling Jaya, Selangor
Software Engineering Immersive Bootcamp

2023

SOFTWARE PROJECTS

Municipal Event Management Platform (Oct 23 – Present)

- **Project Support:** Assisting in the development of a Municipal Event Management Platform to enhance community engagement, aligned with international educational frameworks.
- **Frontend & Backend Enhancement:** Contributing to both frontend and backend features, facilitating community interactions and local event participation.
- **Database Management:** Assisting with database design and management tasks, ensuring data integrity, security, and efficient access for platform functionality.
- **Collaborative Development:** Participating in the architecture of a secure, scalable web solution that supports the principles of a learning city, as promoted by a leading international educational organization.
- **Stakeholder Collaboration:** Collaborating with city council stakeholders and the development team to ensure the platform reflects the city's sustainability and lifelong learning goals.
- **Technical Proficiency:** Utilizing modern web development frameworks to contribute to a high-performing, user-centric experience, adhering to strict confidentiality and data protection standards.
- **User-Centric Optimization:** Aiding in refining the platform by analyzing user feedback and engagement analytics to maintain its position as a cutting-edge tool for community education and engagement.

Portfolio

- Designed and developed a portfolio website using React and SASS to showcase projects.
- Developed a Projects section that displays project information, including project title, description, technologies used, and links to the project's GitHub repository and live website.
- Created a navigation bar using React Router that allows users to easily navigate to different sections of the website.
- Incorporated animations and visual effects using React libraries to improve the user experience.

BookApp

- Developed a web-based book tracking application using Node.js, Express, and MongoDB as the database.
- Implemented RESTful APIs for data storage and retrieval using MongoDB.
- Implemented user authentication and authorization.

Dan's List

- Developed a simple ecommerce application using Node.js, Express, React, and MongoDB as the database.
- Implemented add to cart functionality that allows users to add products to their cart and checkout.
- Developed the front-end using React and implemented responsive design using CSS and Bootstrap to improve the user experience.
- Implemented RESTful APIs to handle requests from the client side.

SKILLS & PROGRAMMING LANGUAGES

Languages :

- JavaScript
- Python
- PHP
- HTML
- CSS
- SQL

Technologies :

- React
- Express JS
- Node JS
- Mongo DB
- Flask
- Filament PHP
- MySQL
- Tailwind CSS
- Alpine JS
- Laravel
- Livewire

Tools :

- Visual Studio Code
- JetBrains
- Git
- GitHub/GitLab

LANGUAGES

- Bahasa Malaysia : Native
- English : Fluent

ADDITIONAL

Certifications

- Software Engineering Immersive Bootcamp – General Assembly **Dec 22 – Mar 23**
- K-Youth Programme: Python Programming Bootcamp **Sept 23**
